Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

Had a wonderful experience with this Estate agents in buying a property I first saw on day one. We were shown around the property(Aimee) with no pressure and given wonderful advice. Arranged a second viewing(Natalie) with a day/time of our choice. Who said buying a house was stressful? Not with this estate agents. All the way through the purchase they were nothing but helpful.(Natalie) They even suggest a conveyancer who was brilliant also.

Testimonial 2
