SALES AND LETTINGS

Planning records for: *Bunkers Hill, Romiley, Stockport, SK6*

Reference - DC/057097
Decision: Decided
Date: 20th November 2014
Description: We have an old Ash tree which is growing outwards and rather large from the land underneath the garage. We have recently lost land due to the drain from the road collapsing as water has run down the embankment. This is being dealt with by the council. The danger is of the tree collapsing and in doing so will take the land, including the garage and part of the garden. This has been pointed out by a couple of inspections from Builders and structural surveyors. Once removed then smaller plantation can be put in place (i.e Holly Bushes). TPO 88E.
Reference - DC/040260

Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

This map displays the noise levels from nearby network rail and HS1 railway routes that affect this property...

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

5		75.0+ dB	■
4		70.0-74.9 dB	■
3		65.0-69.9 dB	■
2		60.0-64.9 dB	■

Testimonial 1

We have gone through the process of buying our first home with Lawler & Co, and they have been excellent. Chloe has pushed to ensure we are in before Christmas, and has been excellent on keeping us updated on the whole chain.

Thank you for your support during this process!

Testimonial 2

We have just used the Marple branch to sell our home and the service from start to finish has been 10/10. The whole team couldn't do enough for us, and took away that extra stress of moving home. We have used other local agents before and the service was no where near as good as Lawler and co.

Thank you so much!

Testimonial 3

Initially dealt with the viewing of my new house through the Hyde Office, I dealt with both Imogen and Stacey who were very friendly and professional. During the sales process I dealt with Chloe in the Marple office who was great, she kept me up to date at all times, chased when necessary and was on hand to answer all queries. Thanks Chloe and the rest of the team, we have now moved in and our both really happy in our new home

Testimonial 4

Lawler and co were amazing from the minute we walked into the Marple office, from fitting in a viewing last minute and giving us advice throughout the process they made the purchase of our first house as stress free as possible.
